

PRESS RELEASE

Date 22.02.2014

iVote Demokra Technology Will be Used for the Repeat Elections in Northern Kosovo

Kosovo Count and Results Center will continue to use iVote Demokra integrated election modernization system for the repeat mayoral election round in North Mitrovica, which will be held on 23th February. All election processes will be conducted in a timely manner, transmitting turnout data and live results.

The system enables electoral configuration and administration, data entry via all kinds of portable devices, verification of ballots, module for tracking and reporting and module for allocating mandates. Responsive design of the system will allow mobile devices, PC-s and tablet computers to process all the election data from re-election round. Central election commission of Kosovo has received the necessary instructions and guidelines for processing diverse kinds of electoral records and publishing reports and statistics up to date.

About iVote:

iVote is a company specialized in election modernization technologies, e-commerce and e-learning systems. iVote's Demokra is an end-to-end state of the art election management platform, providing high security and transparency. iVote Demokra technology has been trusted by more than 107 million voters processed around the world. It has contributed to the most timely, transparent and credible election results in the history as democracies in many countries worldwide.
